# Natalia A. Agapova

Software Engineer

## Education

**Innopolis University** Innopolis, Russia 2022 – 2026

- **Major:** BSc in Applied Artificial Intelligence
- **Programming Coursework:** Operating Systems, Distributed and Network Programming, Networks, Information Retrieval, Advanced JavaScript, Industrial C++
- **SWE Coursework:** Software Project, Front-End Web Development, Software Systems Analysis and Design, Introduction to Optimization, Architecture of Computing Devices

## Employment

**Croissan Studio** **Jun 2025 to present**

*Client Work, NeuroArtist* **Frontend Developer** *May 2026 to present*

- Rebuilding the front-end for Croissan Studio's main website redesign in stages as designers finish each section, shipping new features along the way.
- Restructured the site's UX, increasing clicks on the "Contact us" button by 13%.
- Contribute to front-end client work.
- **Leveraged knowledge** in React, Next.js, and TypeScript to rebuild the site's front-end, styled with Tailwind and built out with Radix UI components and Lucide icons.

*NeuroArtist, Pocket NeuroArtist* **ML Software Engineer** *Aug 2025 to May 2026*

- Worked as the ML engineer across client product teams, including NeuroArtist and Pocket NeuroArtist, delivering end-to-end AI products alongside designers and software engineers.
- Reworked the core model behind NeuroArtist and fully fine-tuned transformer language models, adapting others through prompting, for client products.
- Improved generated-image quality for Pocket NeuroArtist through iterative testing, growing its user numbers by about 5.5%.
- Compared model versions on task metrics, and trained and adapted generative image and talking-avatar models for client projects.
- Also led the NeuroArtist rebrand across physical and digital materials.
- **Leveraged knowledge** in React, Next.js, and TypeScript for product UI.

*NeuroArtist* **Software Engineer Intern** *Jun 2025 to Aug 2025*

- Worked on the NeuroArtist website.
- Helped with ML tasks on the team – including tracking down a bug in the image upscaler that had been mistaken for a model issue – and was offered an ML Engineer role after the internship.
- Contributed to client projects, for example a tourism website and the Moscow 2030 event, etc.
- **Leveraged knowledge** in React and TypeScript to build out the website.

- *Letter of recommendation from the studio's CEO* →

**Asimov Lab (startup)** **Frontend Team Lead & ML Engineer** **Feb to Sep 2024**

- Led the frontend team to the MVP of an AI platform that generates tests for teachers and students.
- Built the MVP version of the website end to end.
- One of six ML developers behind the core model of the product.
- **Leveraged knowledge** in React and TypeScript to lead frontend development.

**Freelance** **Software Engineer** **2022 to present**

- Delivered full products end to end for independent clients – front-end, back-end, and games, as well as landing and promo sites.
- Applied ML work for independent clients.
- Clients included Russian Post, Innopolis City Administration, Innopolis University, Lyceum Innopolis, and others.
- **Leveraged knowledge** in HTML, CSS, JavaScript, React, TypeScript, and Next.js for client sites, Tilda for quick builds, and Python for ML work.

## Personal Projects

**Elaps** Menu Bar App · Swift

- Built a native macOS menu bar app for timers and pomodoro sessions (macOS 13+), in Swift and SwiftUI.
- **Utilized:** Swift, SwiftUI.

**Personal Knowledge System** RAG · Python

- Built a personal AI assistant that answers only from your own PDFs and always cites the exact file and page, powered by a local LLM (Llama 3.2) so nothing leaves your machine.
- **Utilized:** Python, SentenceTransformer, ChromaDB, Ollama.

## Publications

Agapova, N. A.; Lukmanov, R. A. "Improving Fairness in AI-Powered Recruitment: An Interpretable Resume Screening System", 2026. doi:10.66693/mathai.1017

Kholodov, Y. A.; Salloum, H.; Agapova, N. A. "Quantum Annealing Approaches to Breaking RSA Encryption", *Voprosy kiberbezopasnosti*, 2025. doi:10.21681/2311-3456-2025-4-127-133

## Skills

**Languages & Frameworks:** *(proficient)*: Python, JavaScript, HTML, CSS, React, Next.js *(familiar)*: TypeScript, Swift, SwiftUI, Tailwind
**AI / ML:** *(proficient)*: model fine-tuning and evaluation (PyTorch, BERT), Hugging Face Transformers, Diffusers, generative AI, prompt engineering, RAG (ChromaDB, SentenceTransformer), LLMs via Ollama – see Publications
**Tools & Deployment:** *(proficient)*: Git/GitHub, Figma, Tilda *(familiar)*: Radix UI, Lucide, Core ML, ONNX Runtime, model quantization
**Languages**: Russian C2 (native) · English C2 · Ukrainian B1 · French A2 · Tatar A2 · Korean A1
