Natalia A. Agapova

Software Engineer

Education

Innopolis University — Innopolis, Russia — 2022 – 2026

- **Major:** BSc in Applied Artificial Intelligence
- **Programming Coursework:** Operating Systems, Distributed and Network Programming, Networks, Information Retrieval, Advanced JavaScript, Industrial C++
- **SWE Coursework:** Software Project, Front-End Web Development, Software Systems Analysis and Design, Introduction to Optimization, Architecture of Computing Devices

Employment

Croissan Studio — **Apr 2025 to present**

Client Work — **ML Software Engineer** — *Apr 2026 to present*

- Work as the ML engineer in client teams delivering end-to-end AI products, alongside designers and software engineers.
- Fully fine-tuned transformer language models and adapted others through prompting for client products.
- Compared model versions on task metrics to choose what goes into the product.
- Trained and adapted generative image and talking-avatar models for client projects.
- **Leveraged knowledge** in React, Next.js, and TypeScript for product UI, styled with Tailwind.

NeuroArtist, Pocket NeuroArtist — **ML Engineer & Product Designer** — *Jul 2025 to Apr 2026*

- Reworked the core model behind NeuroArtist, with the freedom to explore and test my own approach.
- Improved generated-image quality for Pocket NeuroArtist through iterative testing, growing its user numbers by about 5.5%.
- Restructured the UX of the Croissan Studio website, increasing clicks on the "Contact us" button by 13%.
- Also led the NeuroArtist rebrand across physical and digital materials.
- **Leveraged knowledge** in React and Next.js to restructure the site's UX, styled with Tailwind.

NeuroArtist — **Software Engineer Intern** — *Apr 2025 to Jul 2025*

- Worked on the NeuroArtist website.
- Helped with ML tasks on the team – including tracking down a bug in the image upscaler that had been mistaken for a model issue – and was offered an ML Engineer role after the internship.
- Contributed to client projects, for example a tourism website and the Moscow 2030 event, etc.
- **Leveraged knowledge** in React and TypeScript to build out the website.

- *Letter of recommendation from the studio's CEO* →

Asimov Lab (startup) — **Frontend Team Lead & ML Developer** — **Feb to Sep 2024**

- Led the frontend team to the MVP of an AI platform that generates tests for teachers and students.
- Built the MVP version of the website end to end.
- One of six ML developers behind the core model of the product.
- **Leveraged knowledge** in React and TypeScript to lead frontend development.

Freelance — **Software Engineer** — **2022 to present**

- Delivered full products end to end for independent clients – front-end, back-end, and games, as well as landing and promo sites.
- Applied ML work for independent clients.
- Clients included Russian Post, Innopolis City Administration, Innopolis University, Lyceum Innopolis, and others.
- **Leveraged knowledge** in HTML, CSS, JavaScript, React, TypeScript, and Next.js for client sites, Tilda for quick builds, and Python for ML work.

Personal Projects

Elaps — Menu Bar App · Swift

- Built a native macOS menu bar app for timers and pomodoro sessions (macOS 13+), in Swift and SwiftUI.
- **Utilized:** Swift, SwiftUI.

Personal Knowledge System — RAG · Python

- Built a personal AI assistant that answers only from your own PDFs and always cites the exact file and page, powered by a local LLM (Llama 3.2) so nothing leaves your machine.
- **Utilized:** Python, SentenceTransformer, ChromaDB, Ollama.

Skills

Languages & Frameworks: *(proficient)*: Python, JavaScript, TypeScript, HTML, CSS, React, Next.js *(familiar)*: Swift, SwiftUI, Tailwind
AI / ML: *(proficient)*: model fine-tuning and evaluation (PyTorch, BERT), Hugging Face Transformers, Diffusers, generative AI, prompt engineering, RAG (ChromaDB, SentenceTransformer), LLMs via Ollama – see Publications
Tools & Deployment: *(proficient)*: Git/GitHub, Figma, Tilda *(familiar)*: Core ML, ONNX Runtime, model quantization
Languages: Russian C2 (native) · English C1+ · Ukrainian B1 · French A2 · Tatar A2 · Korean A1
