Education

Innopolis, Russia **Innopolis University** 2022 – 2026

- **Major:** BSc in Applied Artificial Intelligence (GPA: 4.02 / 5)

Employment

Croissan Studio **Apr 2025 to present**

ML Software Engineer *Apr 2026 to present*

- Work as the ML engineer in client teams delivering end-to-end AI products, alongside designers and software engineers.
- Fully fine-tuned transformer language models and adapted others through prompting for client products.
- Compared model versions on task metrics to choose what goes into the product.
- Trained and adapted generative image and talking-avatar models for client projects.

ML Engineer & Product Designer *Jul 2025 to Apr 2026*

- Reworked the core model behind NeuroArtist, with the freedom to explore and test my own approach.
- Iterated on model outputs against client-facing quality bars, running comparisons to decide what shipped.
- Also led the NeuroArtist rebrand across physical and digital materials, and contributed to the Croissan Studio website redesign.

Software Engineer Intern *Apr 2025 to Jul 2025*

- Worked on the NeuroArtist website.
- Helped with ML tasks on the team, and was offered an ML Engineer role after the internship.
- Contributed to client projects, for example a tourism website and the Moscow 2030 event, etc.

- **Leveraged knowledge** in React, Next.js, TypeScript, and Tailwind.
- *Letter of recommendation from the studio's CEO* →

Asimov Lab (startup) **Feb to Sep 2024**

Frontend Team Lead & ML Developer

- Led the frontend team to the MVP of an AI platform that generates tests for teachers and students.
- Built the MVP version of the website end to end.
- One of six ML developers behind the core model of the product.

- **Leveraged knowledge** in React and TypeScript.

Freelance **2022 to present**

Software Engineer

- Built landing pages and promo sites in HTML/CSS/JS and Tilda for cultural and educational clients.
- Applied ML work for independent clients.

- **Leveraged knowledge** in HTML, CSS, JavaScript, Tilda, and Python.

Personal Projects

elaps Menu Bar App · Swift

- Built a native macOS menu bar app for timers and pomodoro sessions (macOS 13+), in Swift and SwiftUI.
- **Utilized:** Swift, SwiftUI.

Personal Knowledge System RAG · Python

- Built a personal AI assistant that answers only from your own PDFs and always cites the exact file and page, powered by a local LLM (Llama 3.2) so nothing leaves your machine.
- **Utilized:** Python, SentenceTransformer, ChromaDB, Ollama.

Skills

Languages & Frameworks: *(proficient)*: Python, JavaScript, TypeScript, React, Next.js *(familiar)*: Swift, SwiftUI, Tailwind
AI / ML: *(familiar)*: model fine-tuning and evaluation (PyTorch, BERT), RAG (ChromaDB, SentenceTransformer), LLMs via Ollama – see Publications
Tools & Deployment: *(proficient)*: Git/GitHub *(familiar)*: Core ML, ONNX Runtime, model quantization, Figma, Tilda
Languages: Russian C2 (native) · English C1+ · Ukrainian B1 · French A2 · Tatar A2 · Korean A1
