

Natalia Agapova

Portfolio · Product / UX/UI Designer

agapnatalya004@mail.ru | [@nhefy](#) | natagapova.ru | [design cases](#)

Product / UX/UI designer with 3+ years of experience in interfaces, visual systems, and branding. I build product screens, landing pages, and promo materials — from structure and user flows to typography and visual polish. I can take a design to a live interface and combine classic design craft with AI tools in production.

Key skills

- UX/UI, product and web design
- Figma, FigJam
- Tilda, Zero Block
- Adobe Illustrator, Photoshop
- Branding, identity, merch
- Landing pages and promo sites
- Graphic design
- Prototyping and user flows
- AI-generated visuals with manual refinement
- Responsive, mobile-first
- Presentations and case studies
- English C1+, native Russian

About

I enjoy designing digital products where structure, visuals, and user flows work together. What I do best is taking an idea all the way to a concrete interface — with flows, states, and details thought through so developers have fewer open questions at handoff. I work both in a studio team and independently on freelance projects — from brief and wireflows to final layouts, graphics, and handoff to build.

Experience

Croissan Studio — product designer

Apr 2025 — present

I work at the intersection of design and front-end, shaping visual identity and digital touchpoints across client and in-house projects.

- Develop brand elements, illustrations, merch, and digital materials in a unified style.
- Contribute to UX/UI and front-end implementation for studio and client products.
- Combine AI generation with manual refinement for speed and visual quality.
- Prepare materials for presentations, case studies, and the studio's public presence.

AzimovLab — frontend lead, design

Feb 2024 — Sep 2024

Startup building an AI service for test generation. I led the front-end team while also owning product design — in a small team, interface, UX, and implementation went hand in hand.

- Designed MVP UX and UI: flows, screens, and components.
- Led the front-end team: task planning, code review, and priorities.
- Built the interface and integrated it with APIs and product logic.
- Shipped the product in a resource-constrained startup setting.

- Landing pages, online stores, and promo sites for cultural, educational, and event projects.
- Posters and visual materials for events in Kazan and Innopolis.
- Figma layouts, Tilda builds, client review, and launch preparation.

Brand design and marketing (volunteering)

2022 — 2025

- **InnoStreetDance** — student dance club at Innopolis University: visual identity, posters, SMM assets.
- **trenirovochnaya.kzn** — dance events in Kazan: brand, promo, and event communication.

Selected projects

POCHTATECH

Innopolis + Russian Post · promo booth

Game UX/UI for an expo booth: explain Russian Post logistics and digital services in under a minute and hold attention in a noisy environment. Built the game scenario, onboarding, registration flow, and UX skeleton of the game screen in the clients' brand style.

Stack: Figma, UX scenario, touch-screen UI

- End-to-end work from booth brief to finished screens and interaction flow.
- Game scenario, onboarding, and participant registration.
- Touch-screen UI in Innopolis and Russian Post brand style.

Game screens · POCHTATECH

Croissan Studio

croissanstudio.ru · in-house

Visual ecosystem for an AI studio: logo, merch, illustrations, and digital touchpoints for the Neuroartist

product. The goal was to connect brand, merch, and interfaces into one recognizable language.

Stack: Figma, Adobe Illustrator, AI + manual refinement

- Brand elements, illustrations, and touchpoints in a unified style.
- Visual language for Neuroartist and the studio's public presence.
- AI generation combined with manual refinement.

AI Camp · Innopolis

aismena.ru

Landing page for a summer AI camp for grades 7–11: parents should understand the program and apply without calling a manager. Built the structure, visual presentation, and full Tilda site on a tight deadline.

Stack: Tilda, Zero Block, typography, forms

- Hero, program, daily schedule, team, pricing, FAQ, and signup form.
- Responsive layout and content hierarchy focused on applications.
- Published on aismena.ru.

Barilova & Tsarev

Kingstep Dance Studio · freelance

An online dance school sells emotion and trust in teachers, not just a course list. Created a strong visual hero, clear program structure, and warm typography; layouts are approved and ready for build. No public site yet — development on the client's side is still unfinished.

Stack: Figma, Tilda, Adobe Illustrator

- Site logic: home, course catalog, class pages.
- Dark studio aesthetic aligned with the Kingstep brand.
- Layouts, promo screens, and graphics for Tilda assembly.

Key screens · Kingstep

How I work

1. Brief: audience, product goal, timeline and format constraints.
2. Structure: user flow, content priorities, key screens and CTAs.
3. Visuals: palette, typography, components, mood, and brand character.
4. Prototype and layout: Figma or Tilda build with responsive in mind.
5. Polish: review, final tweaks, handoff to development or publication.

Additional

- Technical background: I understand front-end constraints when handing off layouts.
- **Research:** two publications — [Google Scholar](#).

Education

Innopolis University, BSc in Applied Artificial Intelligence, 2026.
