Product designer with 3+ years across UX/UI, branding, and promo. I specialize in end to end flows, visual systems, and interfaces that ship; I understand front end constraints at handoff. Looking for product design roles in AI, edtech, or consumer products where design and implementation stay connected.

### Experience

---

#### Product Designer

Apr 2025 – present

*Croissan Studio*

- Built studio identity and visual language across logo, merch, illustrations, and product touchpoints, unifying 12+ client facing assets under one system.
- Designed UX/UI for client projects from wireframes to high fidelity prototypes; aligned flows with dev constraints early to shorten review cycles.
- Integrated AI generated visuals into production with manual refinement, cutting custom illustration turnaround by roughly 40%.

#### UX Designer, Frontend Lead

Feb – Sep 2024

*Asimov Lab*

- Owned end to end UX for an AI test generation MVP (flows, screens, and component library) while leading a 4 person front end team.
- Shipped core educator journeys (test creation, grading, dashboard) in 6 months, enabling a closed beta with 3 pilot schools.
- Reduced design and dev handoff friction by prototyping key interactions in code alongside the team.

#### UX/UI, Web & Branding Designer

2022 – present

*Freelance*

- Delivered 15+ landing pages and brand assets for cultural and education clients; average brief to launch under 3 weeks.
